Township: Agenda			Raspberry Timber Sale	Mixed Hardwood Pulp	1800	Cords
Soil: Fine Sandy Loam			Tract Number: 03-17	Aspen	50	Cords
Topography: Slightly rolling.		4"=1 Mile	Contract Number:	Balsam Fir	20	Cords
				MX Saw	4	MBF
				MH Saw	21	MBF
				Ash Saw	3	MBF

Harvest requirements:

- This is a scaled sale.
- Select cut boundaries are marked in red paint. Aspen clear cut boundaries are marked in yellow paint. Private land boundary is marked in blue paint.
- In the "Select Cut" area harvest all trees marked with an orange slash and aspen and balsam fir with at least 1 100" stick to 4" top.
- In the "Aspen" clear cut patches, cut ALL stems >2" dbh. And utilize all merchantable timber to a 4" top.
- Prior to moving equipment on to the sale area, power wash logging equipment to remove all debris and soil from exterior surfaces.
- Do not cut snags except for individuals that pose a safety hazard.
- This contract requires prior DNR authorization for all road/landing construction.
- Wood may be decked in grass openings, but all logging debris must be removed prior to closing the sale.
- No harvesting March through June to avoid damage to residual trees. The ground must be dry or frozen when harvesting and hauling to minimize rutting and soil compaction.
